

Independent Assurance Statement to Stock Spirits Group plc

ERM Certification and Verification Services (ERM CVS) was engaged by Stock Spirits Group plc (Stock Spirits) to provide limited assurance in relation to the information set out below and presented in the 2019 Stock Spirits' Annual Report.

Engagement Summary

Scope:	Whether the data for Financial Year (FY) 2019 (01/10/2018 – 30/09/2019) for the following indicators are fairly presented, in all material respects, in accordance with the reporting criteria: <ul style="list-style-type: none">• Total GHG emissions (Scope 1 and Scope 2) in tonnes CO₂e• GHG intensity (for Scope 1 and Scope 2 combined) in kg CO₂e per litre of finished goods produced
Reporting Criteria:	WBCSD/WRI Greenhouse Gas protocol and UK Defra & IEA location-based emission factors.
Assurance Standard:	ERM CVS' assurance methodology based on the International Standard on Assurance Engagements (ISAE 3000) Assurance Engagements other than Audits or Reviews of Historical Financial Information.
Assurance Level:	Limited assurance.
Respective Responsibilities:	Stock Spirits is responsible for preparing the 2019 GHG emission data and its presentation in its external reporting, including the 2019 Annual Report. ERM CVS's responsibility is to provide a conclusion on the agreed scope based on the assurance activities as described below and exercising our professional judgement.

Our conclusion

Based on our activities, nothing has come to our attention to indicate that the FY2019 data for the selected indicators, as defined above and listed below, are not fairly presented, in all material respects, with the reporting criteria.

- 2019 Total Scope 1 and Scope 2 GHG emissions: 43,630 tonnes CO₂e
- 2019 GHG intensity: 348 grams CO₂e per litre of finished goods produced

Our assurance activities

A team of assurance, GHG and sustainability professionals undertook the following activities:

- An analytical review of the data from all sites and a check on the completeness and accuracy of the corporate data consolidation.
- A site visit to the Lublin bottling plant in Poland to understand any changes in the business, operations, production levels and data responsibilities that may affect the FY 2019 data, as well as progress regarding ERM CVS' recommendations from our virtual visit last year. We also interviewed staff responsible for the data and reviewed samples of underlying source data for accuracy and completeness.
- A virtual visit (conference call) with the Baltic Distillery in Germany to remotely review the underlying source data.
- Correspondence with staff responsible for collecting and reporting the data, during which we reviewed:
 - Stock Spirits' updates on internal reporting processes and responsibilities;
 - The results from the trend analysis based on 2018 and 2019 full financial year data;
 - The choice and application of emission factors and the reasonableness of estimates and assumptions; and
 - The data for each of the sites included in the consolidated data for 2019.

The limitations of our engagement

The reliability of the assured data is subject to inherent uncertainties, given the available methods for determining, calculating or estimating the underlying information. It is important to understand our assurance conclusion in this context. The procedures performed in obtaining limited assurance (review) are less extensive than those used for reasonable assurance (audit). We believe the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.
